

25th Conference of the Working Group Sustainability / Soilprotection of the Working Community of the Danube Regions Small-Scale Food Production Systems: Innovations for Healthy Soils & People

24th and 25th of April 2018 in Tulln

Small-scale food production systems are increasingly attracting the attention of producers, consumers and scientists as a possible solution to the manifold ecological and economic dilemma of agriculture and food supply in a world with an ever increasing population. Such systems typically involve intense labour and aim at high and diverse productivity on small pieces of land.

24.5.2018 Digitalization in the Danube Regions - IMC Krems

Digitalization has entered all segments of people's lives so that daily routines have become unimaginable without digital technologies. Similar to global trends, the Danube Region as well faces new circumstances, chances and challenges, resulting from increasing computerization processes. This conference therefore discusses possibilities and perspectives relating to e-government and cyber-security, and questions the importance of education for digitalization and labour market needs.

Date: May 24, 2018

Venue: IMC University of Applied Sciences Krems, Am Campus Trakt G 1, 3500 Krems an der Donau, Lower Austria

Language: English

Organizer: Institute for the Danube Region and Central Europe (IDM), Vienna
Co-operation partner: IMC University of Applied Sciences Krems

Patronage: ARGE Donauländer
With kind support of The Province of Lower Austria

25.+26.5.2018 E-Mobility Workshop - AKW Zwentendorf

The CO₂-emissions of the transport sector are despite to many efforts still an essential part of the global greenhouse gas emissions. The reduction of the emissions regarding the mobility sector is a primary challenge for the future. Due to the rapid technological leaps in the last years, more and more e-cars enter the market with longer ranges and better batteries.

The two day-networking-event will focus on the energy reduction potential in the mobility patterns and technology changes of e-mobility. In addition to that participants have the opportunity to test a wide range of e-vehicles at one of Europe's biggest e-mobility-test-events. Furthermore an interesting side program is organised, including a visit of the nuclear power plant Zwentendorf that has never been put into operation and the Benedictine abbey Melk.
